## QUALITY

With over 30 years of experience in the heavy duty trucking industry, United Pacific Industries understand the rigors and stresses that our products are subjected to on the road. It is our mission to provide our customers with products of superior quality and reliability. In achieving this goal, United Pacific only partners with manufacturing facilities that conforms to our quality control requirements and standards. Our manufacturing partners meet or exceed ISO-9001 requirements. In addition, United Pacific's manufacturing partners must be equipped on site to perform the following quality assurance tests:

- AGING TEST
- AIR TIGHT TEST
- DUST TEST
- FLUX TEST
- PHOTOMETRIC TEST
- PULL FORCE TEST
- RAIN TEST
- SALT SPRAY TEST
- SHOCK TEST
- TEMPERATURE TEST
- HUMIDITY TEST
- VIBRATION TEST

United Pacific's manufacturing partners must maintain a track record of consistent quality and low product failure rate. Furthermore, our internal quality control structure allows us to function as the final quality control station prior to shipping. With the assistance of 3D computer technology, United Pacific can adhere to strict quality control standards during prototype creation and the production process. Our engineers and technicians perform a battery of tests to ensure that our products meet the demands of today's drivers and our goal to be first in quality.

## DESIGN

Located near some of the nation's most progressive automotive design centers, United Pacific established the UP Design Studio in 2002 to consolidate our position as the design leader in the heavy duty trucking industry. UP Design Studio utilizes the latest generation of computer aided design (CAD) and studio/graphic software. The design studio is equipped with the newest computers and rapid prototyping systems. In addition, UP Design Studio is staffed by graduates from the nation's most prestigious design colleges.

Unlike our competitors, United Pacific's design and manufacturing capabilities mean that we carry more new and original items than our competitors. The establishment of the design studio will enable us to generate even more new products with significant shorter concept-to-shelf time. The reduction in development cost mean that we can develop products utilizing design based development processes. Design based product development allows United Pacific to create new product concepts based on designs incorporating driver demands and needs instead of economic considerations. United Pacific's emphasis on design distinguishes and positions us ahead of our competitors.

With the assistance of advance 3D scanning technology, our engineers and designers can acquire accurate and precise data in seconds. The 3D data allows United Pacific to verify designs, perform quality assurance tests, and reverse engineer with unprecedented speed and accuracy. Digital inspection contributes to the early detection of shape problems, provides rapid feedback on design, and eliminates unnecessary work in downstream processes. Our rapid prototyping facility permits us to have a concept-to-shelf time of less than 5 months. In addition, United Pacific's 3D printing capabilities permit our designers to have physical models of their design concepts in hours. The physical models allow our designers and marketing staff to evaluate and test the viability of different design ideas. Our rapid prototyping facility allow United Pacific to compress design cycles, improve manufacturing planning, shorten concept-to-shelf time, most importantly, generate new and innovative products.

IMPORTANT: PLEASE REVIEW CAREFULLY

## New Accounts

Initial minimum buy-in is \$2,000 (or to be determined by United Pacific Industries, UPI hereafter). All initial orders must be prepaid in advance by Cashier's Check or VISA/MC. All new/potential accounts must complete a UPI "New Customer Info/Credit Form" and follow the Dealer Qualification Instructions. Upon completion of the credit application, approved accounts will be assigned payment terms of NET 30 Days (from invoice date). Accounts denied a credit line will be required to prepay in advance by Cashier's Check or VISA/MC.

## Payment Terms:

### Term Accounts

Accounts with NET 30 Days terms are required to submit payment within the 30 days from the date of invoice. Acceptable forms of payment include checks, ACH (Automated Clearing House), or wire transfer.

A service charge of 1.5% per month will be imposed on invoices not paid within the 30 day term. Delinquent accounts will be required to pay Cash-In- Advance (CIA). Checks will be accepted but orders will not be released until the check is cleared by the bank. Past due invoices will delay current orders. Please check with UPI on your account status when placing an order.

### Credit Cards

Accounts denied credit terms may pay by Visa or MasterCard. Credit card will be charged upon shipment. Credit card payments will not be accepted once an order has been shipped. UPI does not accept American Express or Discover card.

### COD

A \$9.00 fee will be assessed per COD box for all FedEx/UPS COD shipments. Truck COD shipment fees are to be determined later by trucking company.

### Returned Checks:

A \$30 NSF (Non Sufficient Fund) fee will be assessed on each incidence a check is returned to UPI.

2. E-mail: [sales@upauto.com](mailto:sales@upauto.com)
3. Telephone: In order to minimize errors, customers are encouraged to submit their orders by fax or email. Telephone orders should be limited to smaller orders such as add-ons to orders already submitted and/or fill-ins occurring between larger restocking orders.

## Changes to Orders:

Whenever possible, revisions to orders - additions or deletions of items - should also be submitted via fax or email to reduce the possibility of errors.

Additions/Deletion of items will only be accepted within 48 hours after the initial order date and/or before 12:00PM on the date of the shipment. Additions of items placed after the 48 hours time period will be considered a new order and adhere to a new order freight prepaid policy. ## Canceling Orders:

## Backorders:

Customers have the option of having their backorders shipped or canceled. UPI will notify customer as to availability of backorders and will be able to ship any backorder items customer still needs as part of their next stock order.
